

PRIVACY POLICY

InventraX Desktop Application | v2.0.0

TechFusion Repairs LLC | Effective Date: 2025

SHORT VERSION: InventraX does not collect, transmit, or store any of your data on external servers. Everything stays on your device. We have zero access to your inventory or business information.

1. Introduction

TechFusion Repairs LLC ("we," "us," or "our") is committed to protecting your privacy. This Privacy Policy explains how InventraX (the "Software") handles your data. Because InventraX is a fully offline desktop application, this policy is straightforward: we do not collect your data.

2. Data We Do NOT Collect

InventraX does not collect, transmit, or share any of the following:

- Inventory items, quantities, prices, or SKUs you enter into the software
- Asset records, assignment history, or maintenance logs
- Business names, employee names, department names, or any organizational information
- Barcode or QR code data
- Exported files or reports
- Usage patterns, feature usage, or click behavior
- Crash reports or error logs
- Device information, IP addresses, or location data
- Any personally identifiable information

3. Data Stored Locally on Your Device

All data you enter into InventraX is stored exclusively on your device in the following locations:

File / Folder	Contents
data/inventrax.db	All inventory items, assets, history, and audit logs
logs/inventrax.log	Application activity log — stored locally, never transmitted

File / Folder	Contents
backups/	Timestamped database backup copies
reports/	Exported Excel, CSV, and PDF reports you generate
barcodes/	QR code image files you generate
config/user_prefs.json	Your theme and settings preferences

You have complete control over all of these files. You can view, move, back up, or delete them at any time using your operating system's file manager.

4. Internet Connectivity

InventraX does not require an internet connection to operate and does not make any outbound network connections during normal use. The software does not:

- Connect to any TechFusion Repairs LLC server
- Check for updates automatically
- Send error reports or crash logs
- Access any third-party service or API
- Communicate with any external database

5. Third-Party Libraries

InventraX uses open-source libraries (PyQt5, pandas, matplotlib, SQLite, etc.) to provide its functionality. These libraries operate entirely on your local device and do not transmit data to their developers or any third party. Their presence in the software does not create any data sharing relationship.

6. Children's Privacy

InventraX is a business tool not directed at children under the age of 13. We do not knowingly collect any information from children. Because the software collects no data at all, it is inherently safe for use in any environment.

7. Your Rights and Control

Because all data is stored locally on your device, you have full and complete control:

- Access: Open data/inventrax.db with any SQLite viewer to see all stored data
- Export: Use File menu or Reports tab to export all data to Excel or CSV at any time
- Delete: Delete data/inventrax.db to permanently erase all stored data
- Backup: Copy the backups/ folder to any location you choose
- Portability: Move the entire InventraX folder to any device and your data moves with it

8. Security

The security of your data depends on the security of your own device and storage. TechFusion Repairs LLC recommends:

- Keeping your operating system and antivirus software up to date
- Using strong passwords and disk encryption on devices running InventraX
- Regularly copying backups/ to a secure external location
- Restricting access to the InventraX folder to authorized users only

TechFusion Repairs LLC cannot access, recover, or restore your data under any circumstances, as it is stored solely on your device.

9. Changes to This Policy

We may update this Privacy Policy from time to time. Updated versions will be distributed with new releases of the software. The effective date at the top of this document will reflect when the policy was last revised. Because we collect no data, changes to this policy will generally reflect changes in how the software stores data locally, not changes in data sharing practices.

10. Contact Us

If you have questions about this Privacy Policy or InventraX's data handling, please contact us:
